

1. open a terminal (1<sup>st</sup>)

- i) cd into server folder.
- ii) javac controller/\*.java
- iii) javac model/\*.java
- iv) rmi registry 5000

2. Open another terminal (2<sup>nd</sup>)

- i) cd into server
- ii) java -cp .; "path for db jar file" controller/Main

(Main-> void main class in server.java)

3.1 Open another terminal (3<sup>rd</sup>)

- i) cd into faculty.
- ii) javac controller/\*.java
- iii) javac model/\*.java
- iv) javac view/\*.java
- v) java controller/Main\_Client

(Main\_Client-> void main class in client.java)

3.2 Open another terminal (3<sup>rd</sup>)

- i) cd into Students.
- ii) javac controller/\*.java
- iii) javac model/\*.java
- iv) javac view/\*.java
- v) java controller/Main\_Client

(Main\_Client-> void main class in server.java)

ADVICE:

make new files and folders and copy paste the code.  
(will solve the prev error -> i have no idea why).
